

technology

technology 6kW and 15kW

Aeolus Power has selected 6kW and 15kW Proven wind turbines from Proven Energy Limited, which was first established in 1980.

Since 1991 Proven wind turbines have been installed at hundreds of locations worldwide. Sites range from domestic households to offshore platforms, desert to arctic conditions in both rural and urban locations.

Impressive

"Wind gusts of up to 128mph were recorded in the vicinity of the turbine over this weekend – your technology has not missed a beat throughout.

I am therefore a very satisfied Proven customer and would willingly recommend your products and engineering competence to any potential customer."

Mr G Gordon – 6kW owner in Lancashire

- Proven track record in extreme weather conditions
- Outputs maximum power even in hurricane force winds
- 25 years of wind turbine production
- Established reliability and longevity
- Design works with nature, not against it
